Election/Restrictions

Applicant's election of species A, subspecies A1i and A2i in Paper No. 10 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant stated that claims 1-6, 13-15, 23 and 24 read on the elected species A and subspecies A1i and A2i. The examiner partially disagrees because claims 5-6 directed to the non-elected subspecies A1ii. And thus, claims 5-12 and 16-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species and subspecies.

Applicant also stated that claims 13 and 23 are generic to both species A and B. The examiner disagrees for the following reason.

The elected species and subspecies (including claims 1-4, 13-15, 23 and 24) contains claims directed to the following patentably distinct species of the claimed invention: Species (I) including claims 1-4 and 24 requires a light source for providing a plurality of light beams at a given wavelength, and a surface comprising a thin film in which a reflectance of s-polarized light at the given wavelength and a reflectance of p-polarized light at the given wavelength differ by no more than 3.0% over an incidence angle in the range of 0-60 degrees; and species (II) including claims 13-15 and 23 requires a light source for emitting a plurality of light beams in which a polarization direction of at least one of the light beams is different from polarization direction of the other light beams, and an optical surface having a reflectance for s-polarized light and a

Art Unit: 2872

reflectance for p-polarized that are substantially the same at a predetermined angle to the optical surface.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2872

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
